

Profile

After six years I spent in London, I decided to come back to Slovakia previous year. When I came, I spent one year working as front end web developer in Buckle up company. Except that, I have a handful of successful projects as a freelancer. I am looking for a full time job as a front-end web developer at the moment. Please feel free to visit my personal website on <https://miro.vladovic.sk> where you would find list of my projects.
